

# Appium Studio for Eclipse - Collect Support Data

**Collect Support data**, helps the user to collect the support data error logs, etc.

This feature is useful for **troubleshooting problems by support** when there are problems encountered by Experitest users. Once they have collected the data it can be sent to support.

This feature is accessible via the main menu, **Appium Studio -> Collect Support Data**.

Once the 'Collect Support Data' is clicked a dialog appears.

Please specify the directory in '**Download to**' where support data will be downloaded.

Please check '**Attach device data**' and provide a **connected device** if you need to get a device log and click **OK**.

Collect Support Data

### Collect logs from server and the specified device

Please specify the additional materials to attach

Download to:  Browse...

Attach project directory:  Browse...

Attach application file:  Browse...

Attach device data (device should be connected in order to collect data)  ▾

Collect only latest log files

OK Cancel

This will start a process to download the data.

Collect Support Data
