

GetElementCount

Description

Count the number of times an element or text is found.

Parameters

Name	Value	Description
Zone	<ul style="list-style-type: none">NATIVEWEBTEXT	Zones which define the way the element will be identified.
Element	String which identifies the Element	Common identifier to all the elements to count.

Usage

Command can be used to get the count of element found in a screen.

Set Experitest Url

Please make sure you replace `<EXPERITEST_URL>` with appropriate URL in the code snippet below.

- For SeeTest cloud, **EXPERITEST_URL** needs to be <https://cloud.seetest.io:443/wd/hub>
- For Dedicated Experitest Lab, **EXPERITEST_URL** needs to be your own domain. e.g - <https://company.experitest.com>

Example

GetElementCount

```
DesiredCapabilities dc = new DesiredCapabilities();
driver = new AndroidDriver(new URL("<EXPERITEST_URL>"), dc);
seetest = new SeeTestClient(driver);
dc.setCapability(MobileCapabilityType.UID, "<deviceid>");

...
...
// Counts the number of times element corresponding to //*[@class='android.widget.TextView'
int int0 = client.getElementCount("NATIVE", "//*[@class='android.widget.TextView']");
```
