Browser - Manual Reports

Reporting gives user the ability to record actions on a browser and generate a report about them.

Open a new Manual Report

On the web-studio action panel, press on "Report" button to open a new manual report.

Create a new Manual Report

For instruction how to use manual report please view: [Mobile Studio - Manual Reports](#)

QC Reports

Save and View QC Report

To create manual session with QC report use API from [Selenium REST API](#).

When starting QC report, the report window will already be open, with all the steps from the API request.

For instruction how to use QC report you can use [Mobile Studio - Manual Reports](#)
