

# Rest API

The Continuous Testing Cloud exposes Rest API's to perform operations such as,

- Managing project resources like applications and devices.
- Test Executions

These API's help users to perform operations based on Rest standards which are already built in SeeTest Web Interface.

Following sections provide details in the usage of these API's:

- [How To Execute Rest API](#)
- [Users Rest API](#)
- [Devices Rest API](#)
- [Applications Rest API](#)
- [File Repository Rest API](#)
- [Selenium REST API](#)
- [Device Reservations Rest API](#)
