

Reports

Manual Testing includes several reporting capabilities that allow you to keep track of your work and document the steps that you have taken while testing. Other reporting capabilities include the ability to take screenshots of the device in real-time, as well as recording videos and also reporting issues to the device lab admin.

Below is a list of reporting capabilities that you can make use of:

- [Getting Device Logs](#)
- [Taking a Screenshot](#)
- [Video recording](#)
- [Generating Manual Reports](#)
