

SeeTestAutomation- ClearLocation

clearLocation()

Description

The command gives the ability to reset the device's location services after the user executes the [SeeTestAutomation- SetLocation](#) command.

Notes:

- In Android, command supported since **Android 4.4**.
- Pre-requests: Enable the **location provider service** you wish to work with, by:
 - **For Android:**
 - [SetProperty](#). For example:
 - if you want to the command to work based on GPS only .i.e. 'Device Only Mode', prior to clearLocation, you can call:

```
client.setProperty("location.service.gps", "true");
client.setProperty("location.service.network", "false");
```
 - if you want to the command to work based on GPS and Network .i.e. 'High Accuracy Mode', prior to clearLocation, you can call:

```
client.setProperty("location.service.gps", "true");
client.setProperty("location.service.network", "true");
```
 - **For iOS:**
 - on your device: Go to: Setting >> Privacy >> Location Services >> enable "Locations Services".
