

Limitations on iOS devices

iOS 15 and 16 with passcode

We recommend not setting authentication for unlocking iOS 15.x and 16 beta.

This includes passcode, TouchID, and FaceID.

Setting an authentication will require the user to authenticate each run issued by our automation environment, and thus will need **manual** user approval.

iOS 16 Limitations

The proper dump is not retrieved for stage manager app on iPads with M1 Chip.

iOS 15.6 beta 2 (19G5037d) on iPad Pro (1st gen) 9.7-inch

The iOS 15.6 beta 2 (19G5037d) version doesn't work on iPad Pro (1st gen) 9.7-inch against the cloud.
We recommend not to update devices of this model to iOS 15.6 beta 2.
