

Viewing a Device During Execution

Permissions:

- Cloud Administrators can view devices of all running test requests in the system.
- Project Administrators can view devices of all running test requests that were created by users in the project administrator's project.
- Users can view devices of their own running test requests.

Option 1:

Click on the *View* button:

Option 2:

A link to the device view will be printed out to the console of your IDE when running the test request:

```
Wed Dec 19 16:52:01 IST 2018 [main]
Link for view: http://cloud.seetest.io:8080/#/Yz6FYvfmOOQb7T4j?1
Picked up Grid Node (seetest_7797)
Reserved Device : LGE Nexus 5
```

When you visit the link, the device view screen is opened, but actions cannot be performed on the device screen (view-only mode).

The user can view how the test is running live on the device.
