

Reports Page - View all users tests

Project Admin can view the reports generated as a consequence of test runs of all users under his projects.

The list of the reports can be viewed using Reports Page i.e. **clicking Reports** on the cloud dashboard.

Reports displayed in Reports Page depends on the **Role of the logged in User**.

- For a Project Admin, reports of all users under his management will be displayed (Additional User field is added in Report Page Column).
- For a Cloud Admin, reports of all users from all projects will be displayed (Additional User and Project field is added in Report Page Column).
- For a standard User, only his reports will be displayed.

The screenshot shows the QA Cloud interface with the Reports page selected. The table displays test results with columns for ID, Test Name, Status, Type, Platform, OS, Duration, Created, Started, Executor, and User. The 'User' column is highlighted with a red box, showing various users like 'ido_projectadmin', 'Shell', 'Eyalk', 'Ido', and 'Ido_admin'.

ID	Test Name	Status	Type	Platform	OS	Duration	Created	Started	Executor	User
