

SeeTestAutomation- Connecting Devices And Emulators

This section provides detailed step-by-step instructions on how to connect a mobile device or an emulator to SeeTest Automation:

- [A real physical device](#) – such as Android and iOS – using a standard USB cable or WiFi
- [A corresponding emulator](#)
- [A Cloud device](#) - a real physical device connected to a remote computer

All tests can be run on either a connected device or its corresponding emulator.
