

# Timeout Capabilities

## Timeout Configuration

Name	Description	Units	Default Value
newSessionWaitTimeout	Timeout for new Session creation How long should we wait before failing the driver initialization	Seconds	10 Minutes
newCommandTimeout	The timeout of a command, before the server, closes the session (seconds)	Seconds	30 Seconds
endSessionWaitTimeout	The timeout of ending appium session (driver.quit()) Reports are uploaded to reporter during ending appium session.	Seconds	5 Minutes

## Examples:

### Java

```
dc.setCapability("newSessionWaitTimeout", 300);  
dc.setCapability(MobileCapabilityType.NEW_COMMAND_TIMEOUT, 15);
```

### Python

```
self.dc["newSessionWaitTimeout"] = 300  
self.dc["newCommandTimeout"] = 15
```

### C Sharp

```
dc.SetCapability("newSessionWaitTimeout", 300);  
dc.SetCapability(MobileCapabilityType.NEW_COMMAND_TIMEOUT, 15);
```

### Ruby

```
desired_caps = {  
  caps: {  
    newSessionWaitTimeout: 300,  
    newCommandTimeout: 15,  
    browserName: 'safari'  
  },  
}
```
